

## Directions

Below are the instructions for running a Capture the Flag tournament in breve. See `CaptureTheFlagSample.tz` for two simple strategies being run against each other in a tournament.

- You'll need to download the Capture the Flag files from [www.spiderland.org](http://www.spiderland.org)
- Two teams of 10 players compete. In the `Tournament.tz` file, these teams are `Champion` and `RunnerUp` by default.
- To run a match between two strategies:
  - Edit the file `Tournament.tz` (included with the download files).
  - Include the proper source files with "`@use`" lines
  - Change the two "new" lines (16 & 18) to create the proper object types.
  - Change the "set-tournament-length" line (22) to make the tournament run as many games as you want.
  - Run the simulation!
